

STEEL BLACK DISC BASE DINING

COLLECTION: Table Bases

CFD17-DH

The Steel Black Disc Base (Dining) delivers a sleek, modern look with the stability needed for bar-height applications. Its straight, cylindrical column sits on a broad disc base that creates a secure, evenly weighted foundation while keeping the area around the table open for comfortable seating and easy movement. The low-profile shape helps minimize tipping and reduces the chance of rocking in busy environments.

Designed for commercial use, the steel construction supports frequent, daily wear, and the top mounting plate provides multiple fastening points to keep tabletops firmly secured. With its simple, understated form and reliable performance, this base is an ideal choice for hospitality bars, cafés, and communal standing-height tables.
