

STEEL BLACK DISC BASE BAR

COLLECTION: Table Bases

CFD22-BH

The Steel Black Disc Base (Bar) is designed with an oversized, wide-disc base to provide extra stability in bar-height settings. The expanded footprint adds weight and balance at floor level, helping prevent rocking and keeping the table steady in high-traffic environments. A clean, cylindrical column rises from the large, low-profile disc to maintain an uncluttered look while preserving comfortable leg clearance around the table.

Built for commercial performance, the durable steel construction stands up to frequent use, and a heavy-duty mounting plate at the top offers multiple attachment points for a secure tabletop connection. With its larger base and minimal, modern silhouette, this bar-height base is a dependable choice for hospitality, café, and communal seating areas.

KEY FEATURES:

- ◇ **Heavy-duty steel construction**
Built for lasting performance in high-traffic environments
- ◇ **Wide 21.5" disc base**
Provides excellent stability and balance
- ◇ **Reinforced 3" post**
