

# STEEL BLACK DISC BASE DINING

**COLLECTION:** Table Bases

**CFD22-DH**

The Steel Black Disc Base (Dining) features an extra-wide disc base that adds noticeable stability for dining-height tabletops. By increasing the footprint at the floor, the base helps keep tables firmly grounded and reduces movement in busy hospitality spaces. A straight, cylindrical column keeps the profile clean and unobtrusive, while the low, rounded base maintains generous leg room for guests.

Constructed from durable steel for commercial use, the base includes a reinforced top plate with multiple fastening points to secure the tabletop tightly in place. The result is a modern, minimal foundation that performs reliably in cafés, and high-traffic dining environments.

## KEY FEATURES:

- ◆ **Heavy-duty steel construction**  
Built for lasting performance in high-traffic environments
- ◆ **Wide 21.5" disc base**  
Provides excellent stability and balance
- ◆ **Reinforced 3" post**
