

COLT SIDE CHAIR

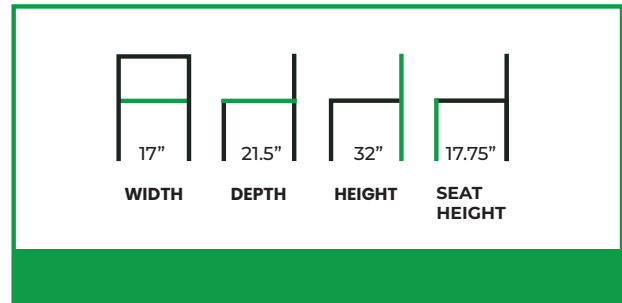

COLLECTION: Signature

SC-831SC

The Colt Side Chair uses a pared-back, all-wood structure to deliver sturdy everyday seating with a light, sculptural profile. A rounded backrest is mounted on slim uprights, providing focused upper-back support while keeping the chair open and easy to move around. The seat is gently contoured and slightly cupped, helping guide posture and improve comfort without added bulk.

Structurally, the chair is built on four subtly splayed legs that widen the stance for stability. The back supports tie directly into the seat frame, creating a rigid spine that reinforces the chair when leaning back. With its armless form, compact footprint, and durable frame construction, the Colt is well-suited for dining rooms, cafés, and spaces that need efficient layouts and dependable performance.
