

GRANVILLE SIDE CHAIR

COLLECTION: Envision

ENV-317SC

The Granville Side Chair captures the beauty of simplicity through clean geometry, thoughtful craftsmanship, and a distinctly modern edge. Its softly contoured plywood seat and backrest appear to float effortlessly atop a slender steel frame, creating a silhouette that feels light, refined, and intentionally understated.

Every detail is carefully considered, from the gentle curves that enhance comfort to the exposed hardware that adds a subtle industrial touch. Angled legs create a dynamic architectural profile, giving the chair movement and visual interest while maintaining a minimalist aesthetic.
