

ALCOTT BARSTOOL

COLLECTION: Envision

ENV-529BS

The Alcott Barstool blends warm natural textures with an architectural metal frame, creating a refined balance between industrial and Scandinavian-inspired design. Its gently curved wood seat and backrest introduce organic softness, while the angular powder-coated steel structure delivers strength, stability, and a striking geometric silhouette.

Designed with clean lines and thoughtful proportions, the Alcott Barstool offers a comfortable seating experience suited for hospitality spaces, cafés, bars, and modern dining environments.
