

ELTON ARMCHAIR

COLLECTION: Envision

ENV-607AC

The Elton Armchair is a masterclass in mid-century sophistication and modern architectural precision, designed to serve as a functional piece of art in any contemporary space. Its defining feature is a continuous, low-slung backrest that curves seamlessly into integrated armrests, perfectly cradling the body while maintaining a sleek, unobstructed profile. This upper cushioning utilizes an open-back design that creates a striking “floating” illusion, anchored only by slender vertical supports.

Grounded by an ultra-minimalist tubular framework, the chair effortlessly balances organic curves with industrial rigidity. The plush, generously padded seat cushion features crisp, tailored edges that beautifully contrast against the lean, polished legs.
