

CAESAR SIDE CHAIR

COLLECTION: Envision

ENV-771SC

The Caesar Side Chair embodies a striking, industrial-leaning aesthetic rooted in minimalist utility. Its design features a deeply saturated, black-stained wooden seat and backrest, intentionally finished to let the organic beauty of the natural grain peek through the dark tone. The rounded, wide-set backrest and gently contoured seat offer an inviting, ergonomic cradle without sacrificing its clean, sharp silhouette.

Supporting the wooden components is a robust, matte black tubular steel frame that flows effortlessly into sleek, tapered legs. On the reverse, a functional metal handle detail adds a subtle nod to classic schoolhouse or studio seating, blending everyday durability with high-design sophistication. Perfectly versatile, this all-black piece brings a grounded, contemporary edge to dining spaces, creative studios, or urban cafes.
