

EDGAR SIDE CHAIR

COLLECTION: Envision

ENV-813SC

The Edgar Side Chair brings a rugged, commercial-grade energy into a refined silhouette, perfectly fusing industrial strength with natural texture. It features a wide, gently curved backrest and a contoured seat crafted from rich walnut-finished wood, beautifully showcasing prominent organic grain patterns.

The upper seat elements are anchored by a sturdy, semi-gloss black powder-coated steel base, utilizing wide, architectural legs reminiscent of classic Tolix bistro designs. On the reverse, a sleek black steel support frame extends upward to hold the backrest, complete with an integrated, functional handle bar for easy rearrangement. This robust construction makes the piece highly durable and an excellent fit for high-traffic dining rooms, urban kitchens, or rustic cafe spaces.
