

VANCE SIDE CHAIR

COLLECTION: Envision

ENV-842SC

The Vance Side Chair turns organic curves into a striking design feature, blending sculptural form with everyday functionality. Its fluid plywood shell creates a seamless silhouette that gently wraps around the body, offering both visual softness and ergonomic comfort. The waterfall seat edge and winged backrest add movement and character, giving the chair an effortlessly refined presence from every angle.

Slim metal legs provide a clean architectural contrast, balancing the warmth of the molded wood with a lightweight, modern industrial feel. Designed for dining spaces, cafés, hospitality interiors, and contemporary commercial settings, the Vance Side Chair brings timeless style, comfort, and sculptural elegance into any environment.
